Summary

Full-Stack Software Developer with 2 years of experience, specializing in React, React Native, and Next.js to build dynamic web and cross-platform mobile applications. Proficient in the MERN stack and Firebase, I deliver scalable solutions from front-end to back-end. I bring proven leadership experience, having guided development teams on diverse projects, and a passion for crafting innovative, user-centric software.

Experience

LogiSian Technology Solutions Pvt. Ltd. ⊕ | July 2024 - June 2025
Software Engineer   Mangaluru, Karnataka, India

- Developed a React Native app with interactive percussion tunes, featuring play/pause and speed controls. Implemented audio bundling and a custom 'About' screen as the sole developer.
- Contributed to a React Native link-in-bio app by implementing user authentication and Instagram Business login. Integrated Firebase email verification and managed user account functionalities.
- Maintained and enhanced a React Native/Next.js gin platform, improving search and implementing analytics. Developed features like room creation, review/rating systems, and integrated Firebase functionalities.

Skills: React,React Native,Next.js,JavaScript,TypeScript,Firebase

Nicozn Technologies ⊕ | Apr 2023 - May 2024
